EXAMINER'S AMENDMENT

Claims 1,3,4,6-12 are allowed.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Steve Underwood on 6/5/08 (to computer implemented changes per 35USC101) and on 6/20/08 as to modifications suggested for clarity of reasonably priced)

A. Please cancel claims 13-16.

B. Please amend claims 1,11 as follows;

1. (Currently Amended) A method for facilitating trading of securities over a computer system, comprising the computer implemented steps of:
electronically receiving a first buy or sell order for a security from a first user;
calculating a block price range for said security, said block price range having an upper end and a lower end;
determining that said first order has a price that is reasonably priced, wherein said price is considered reasonably priced if said price comprises either:
for a sell order, said price is equal to or lower than said upper end of said block price range, or
for a buy order, said price is equal to or higher than said lower end of said block price range;
transmitting to a second user an electronic notification that a reasonably priced order for said security is present, but without notifying said second user of the side of said first order;

Art Unit: 3691

receiving a second order from said second user, wherein said second order is a contra to said first order and said second order has a second price limit that crosses a first price limit of said first order; and
executing a trade comprising said first order and said second order at an execution price that complies with said second price limit and said first price limit said timid.

11. (Currently Amended) A method for facilitating trading of securities over a computer system, comprising the computer implemented steps of:
electronically receiving a first buy or sell order for a security from a first user;
calculating a block price range for said security, said block price range having an upper end and a lower end;
determining that said first order has a price that is reasonably priced, wherein said price is considered reasonably priced if said price comprises either:
for a sell order, said price is equal to or lower than said upper end of said block price range, or
for a buy order, said price is equal to or higher than said lower end of said block price range;
transmitting to a second user an electronic notification that a reasonably priced order for said security is present, but without notifying said second user of the side of said first order;
receiving a second order from said second user, wherein said second order is a contra to said first order and said second order nearly matches but does not cross said first order; and transmitting an electronic contra order notification to said first user after said second order is received, said contra order notification indicating that a nearly matching contra order is active within the system.

2. The following is an examiner's statement of reasons for allowance:

The most relevant prior art of record Shaw Publication 20030004859 teaches

Transmitting to a user that a reasonably priced order is present and confidential

matching of traders. However, Shaw is based on indications of interest which are not

binding orders and further relies on party to party direct negotiation to complete a trade.

Shaw fails to teach confidential block trading (as opposed to matching interested

parties), and presenting a firm order to the trading system which does not indicate the

side of the trade (ie. buy or sell) from the other traders. This feature is found in independent claims 1 and 11.

Thus, the instant application is differentiated from the nearest prior art and other related art in that it hides the order type (buy or sell) from the other parties to the trade, thereby preventing other parties from being able to profit from the knowledge that the buy or sell order exists for a large block.

Updated searches revealed no references that disclosed the claimed inventions nor were any secondary references identified which could be reasonably combined with the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
